## SERVICES

- Design
- Build
- Maintenance
- Refit
- Repair

## PORTFOLIO

- Pilot Boats
- Workboats
- Wind Farm Support Vessels
- Survey Vessels
- Patrol Craft
- Passenger Vessels
- RIBs

## CAPABILITIES

- Welding and Fabrication
- Electrical Engineering
- Marine Coatings & Blasting
- Thermal Insulation
- Sheet Metal Work
- Laser Alignment
- Reverse Engineering
- Predictive Maintenance
- Project Management

## LIFETIME VALUE

The cost of a vessel extends well beyond the initial build cost. Our focus is on the true lifetime value of any vessel to ensure it gives maximum return for the full time in service. This is a major focus during initial specification, design and build, through to ongoing preventative and predictive maintenance.

## DESIGN

We have an experienced in-house team of senior naval architects offering extensive design options from both our own portfolio and those under agreement from world class design houses.

At Mainstay Marine Solutions we offer a bespoke service to adapt and detail any design in terms of mechanical, electrical and fitout specifications to meet specific requirements.

## TIME IS CRITICAL

Whether your vessel is a new build, a conversion or refit, requiring scheduled service and maintenance or necessary repairs, we know minimal downtime is key. At Mainstay Marine Solutions we apply absolute precision and craftsmanship to every job, large or small, to ensure downtime is used effectively to give optimum results.

## PRECISION CRAFT

Central to Mainstay Marine Solutions are our people. Our highly skilled, employed workforce live and breathe the boats we build and service.

We are responsive, exacting and committed to an outcome that is right for our clients - both individually and as an organisation.

It is of vital importance to us that we maintain an open and flexible relationship with our clients for the duration of any project and beyond.

# RIBWORKER<sup>®</sup>

We are designers and manufacturers of aluminium RIBs for extreme conditions: passenger craft, working boats, multi-function support, inshore search and rescue and quick recovery vessels.

We can design and custom build almost any configuration to suit your needs plus we can build from our standard design stock readily available at your request.
